CraneMate Phase Lifter

The Universal Pin-On Crane Jib Boom Phase Lifter and Platform with a Self-Contained Power Unit

The *CraneMate Phase Lifter Jib Boom* pins to your crane's existing swing jib sheave head. The attachment design can transform many existing cranes (equipped with boom function radio remotes) into highly specialized insulated aerial lift bucket trucks. Excellent for delicate transmission line work; fiberglass basket optional.

The attachment has both hydraulic auto leveling of jib boom and basket along with 350 degrees of hydraulic rotation. The self-contained 12-volt hydraulic power package includes an integral radio remote proportional control package to control both jib boom and basket features.

Crane Requirements:

- Crane design must be approved for platform attachment
- Crane should have a swing jib sheave head design with 4 pin points
- A valid load capacity and work range chart for specific model of crane must be provided
- Work range and platform capacity are dependent on crane capacity
- One of several requirements to achieve compliance with ANSI 92.2 includes radio remote boom controls at platform

Reach-All's CraneMate Phase Lifter Jib Boom

Reach-All's *CraneMate JibBoom* is self-contained jib boom connects quickly to the head of a crane's swing jib with just **4 universal pins**. It comes complete with a battery-powered onboard hydraulic system and all platform controls.

Features include an electronic leveling sensor and radio remote controls for leveling override and proportional platform rotation control and a foot-actuated auto leveling enable control switch.

Capacity: 800 lb.

Jib Boom Lengths: 8'

Platform Dimension: 60"L x 34"W x 42"D

350° hydraulic rotation by a slewing ring bearing and hydraulic self-locking worm drive.

Storage Fixture with stirrups for fork lift.

Stows to crane's boom for road travel and instant action on the jobsite!

Quickly transforms a crane into a one-of-a-kind state-of-the-art aerial bucket truck.

CraneMate Jib Boom
